

>>> END OF SCHOOL YEAR WRAPUP

THANK YOU

Nate Zier
Executive Director
nate.zier@nice-kc.com
(816) 710-6640

We wanted to send a brief end of year wrap-up to our supporters this year. Support comes in a wide variety of means. Many of you as individuals or organizations have supported our mission through time, talent or treasure this year. We are looking for additional ways to engage teachers, students and parents in the 2024-2025 academic year. We kick off the year in July with our Summer Educator Externship which will engage 15 educators in a 24-hour industry driven learning experience.

>>> OSHA TRAINING
40 Students

NICE has sponsored OSHA-10 training for two schools in 2023-2024 resulting in 40 additional students receiving OSHA-10 training. In person training is valuable when it comes to safety, and being able to facilitate these sessions is meaningful for industry preparation. We are looking at ways to expand our ability to provide OSHA training.

NICE engaged 235 Seniors from 21 different high schools in Senior Visits with local labor partners. These experiences are designed to increase student awareness of apprenticeship and training programs to get them industry ready out of high school. Interested in hosting a visit please reach out.

>>> 235 Students
>>> SENIOR DAY VISITS

>>> ISBE PARTICIPATION
120 Students

The Institute for Shaping the Built Environment is NICE's middle-school design build competition. We engaged with 7 schools and 120 students this year. This experience gives students insight into the design-build process and teaches teamwork as well as integrated math and business concepts.

>>> iBUILD SHOWCASE
~2,500 Students

iBuild Showcase remains one of the largest hands-on experiences for students in the region. Final metrics are being tabulated, however, we show approximately 2500 students in attendance from 37 high schools and 18 middle schools. Students were able to explore activities from over 50 local companies set up in 49 exhibit spaces. A special thanks to UMB Bank and Powell CWM for their additional support of the 2024 iBuild Showcase. We hope you can join us next year.
